Summary

Data and operations analyst with 3+ years turning messy ERP and operational data into reporting systems that teams actually use. Hands-on with SQL, DOMO, Power BI, and Power Automate across inventory, sales, and supply chain functions. Track record of cutting manual work, improving data accuracy, and building dashboards that give leadership clearer visibility into what's happening.

Professional Experience

Business Operations Analyst II / Digital Dynamics, Inc.

Sep 2024 - July 2025

- Wrote SQL queries to extract and transform ERP data from SYSPRO, building recurring Excel-based reporting systems used by purchasing, sales, and inventory teams to support daily operational decision-making.
- Automated a weekly Open Order Report system using SQL, Power Automate Cloud, and dynamic supplier-level filtering logic, reducing manual reporting effort by 90%.
- Defined KPI frameworks and developed reporting dashboards in DOMO and Excel, increasing leadership visibility into inventory consumption trends, order status, and gross margin exposure.
- Improved and stabilized the Lam Research consignment fulfillment process within SYSPRO, correcting inventory discrepancies, streamlining transaction flows, and formalizing written procedures to maintain data integrity.
- Supported Forecast2 MRP testing and implementation by validating ERP data structures, resolving BOM inconsistencies, and improving forecast accuracy inputs across purchasing and production workflows.
- Coordinated initial Vietnam production shipments by designing and documenting end-to-end manufacturing, labeling, logistics, and supplier portal workflows to support successful international order fulfillment.
- Conducted tariff exposure analysis by engaging with U.S. regulatory authorities to model potential duty impacts and assess downstream margin implications prior to overseas expansion.

Sales Operations Analyst / Digital Dynamics, Inc.

Dec 2023 - Sep 2024

- Analyzed and consolidated customer forecasts, improving consumption accuracy by 20%, leading to a reduction in excess inventory and enhanced purchasing strategies.
- Utilized advanced Excel functions and Power BI to generate data-driven recommendations, enabling the sales team to proactively respond to market trends and optimize sales strategies.
- Led the implementation of a company-wide data visualization tool, significantly improving data accessibility and decision-making speed across departments.

Supply Chain Analyst / Digital Dynamics, Inc.

Aug 2023 - Nov 2023

- Extracted, cleaned, and analyzed over 1,000 BOMs from Syspro, enhancing data accessibility and supporting efficient component management for supply chain operations.
- Improved data integrity by updating Syspro with accurate AVL/AML information for 700+ BOMs, contributing to a 10% increase in manufacturing efficiency and product quality.

Technical Skills

Languages & Tools: SQL, Excel, DOMO, Power BI, Power Query, Power Automate Cloud/Desktop, Arena PLM, Syspro & SAP ERP, Microsoft Office Suite

Methods: Data modeling, business analytics, statistical analysis, BOM management, forecasting, inventory optimization, shipping logistics, PLM/ERP system process flows

Education

California State University, Long Beach / Bachelor of Science, Business Management

Aug 2020 - May 2023 (3.7 GPA)

Cabrillo College / Associate of Science, Business Management

Aug 2016 - May 2020 (3.8 GPA)
